Software Developer / Data Engineer

Work Experience

Software Developer / Data Engineer

Litum Technologies

December 2022 - August 2023 / Izmir, Turkey

- We created Analytical Reporting Service and Machine Learning studies with Amazon real time location data

- Built ETL pipelines using technologies such as Python, C#, Microsoft SQL Server, Apache Cassandra and more

- Built microservices using .NET, .NET Entity Framework, SQL and more technologies

- Reduced response times by optimizing microservices

- I made classification and prediction on location data using Machine Learning Algorithms with Python.

Education

Computer Science Department
Dokuz Eylul University (Bachelor's Degree)

September 2017 - June 2022
